

Description

The lift features an asymmetrical post and support arm design, creating a wide and unobstructed pick-up area for improved vehicle access and positioning.

For enhanced safety, the supporting arms automatically lock into position during lifting operations. Once the lift is fully lowered, the locking mechanism is automatically released, ensuring controlled and secure operation throughout the lifting cycle.

Closely spaced locking positions, combined with a manual lock-release function, allow for precise adjustment and smooth operation, improving overall ease of use.

Manual Controls

- ✔ Single-hand conventional operation
- ✔ Manual lock release for controlled lowering

Technical data and Dimensions

Load Capacity	6500 kg
Overall Height	4976 mm - 5432 mm
Overall Width	3937 mm
Lifting Time	60 sec
Required Ceiling Height	5600 mm
Power Supply	3 phase 400 V, 50Hz
