

Compatibility (Up to)

Description

This professional diesel emissions testing system is designed for MOT testing stations and workshops requiring accurate, reliable and DVSA-compliant smoke analysis. Fully approved for Category A and B MOT testing, the system complies with the latest DVSA MTS regulations and supports testing of modern Euro 6 diesel vehicles.

The system features the high-precision DX260 diesel smokemeter for fast and accurate emissions measurement, supplied factory calibrated for immediate use. A compact Windows 11 Micro PC with WLAN and Bluetooth connectivity provides efficient system operation, while the colour monitor delivers clear visibility of live readings and test results.

Included as standard are a Bluetooth oil temperature probe, exhaust sampling probe and HGV sampling pipe accessories for commercial vehicle testing applications. Optional OBD VCI integration is also available for enhanced vehicle communication.

Manufactured and fully supported in the UK, this complete solution delivers dependable performance, user-friendly operation and full compliance with current DVSA roadworthiness and emissions testing standards.

Standard Equipment

- ✔ Emissions Trolley
- ✔ Gas Analyzer
- ✔ Bluetooth Smoke Meter
- ✔ EOBD Connection
- ✔ Bluetooth Oil Temperature Probe
- ✔ Battery RPM Measurement
- ✔ PC Kit

Technical data and Dimensions

Cabinet Dimensions	1600mm(H) x 950mm(W) x 700mm(D)
Connection Method	WiFi/Bluetooth
Fuel Types	Petrol/Diesel
Power Required	240v 50/60hz
