

Compatibility (Up to)

Description

Designed to meet the latest Driver and Vehicle Standards Agency (DVSA) roadworthiness requirements, our Diesel Smoke Meter System provides accurate and reliable emissions testing for modern diesel vehicles. Following the updated DVSA Guide to Roadworthiness, any vehicle displaying visible exhaust smoke must now be tested using a diesel smoke meter to confirm compliance with legal emission limits.

Built on proven industry expertise, this fully compliant system meets the latest DVSA MOT Testing Service (MTS) regulations and is approved for Category A and B MOT testing. The system features the advanced DX260 diesel smoke meter, Euro 6 compatibility, a Windows 11 Micro PC with WLAN and Bluetooth connectivity, colour monitor, Bluetooth oil temperature probe, and HGV exhaust sampling accessories.

Factory calibrated and manufactured in the UK, the system is supplied ready for immediate use, ensuring MOT stations and workshops can carry out fast, professional, and dependable smoke emissions testing.

Standard Equipment

- ✓ Emissions Trolley
- ✓ Bluetooth Smoke Meter
- ✓ EOBD Connection
- ✓ Bluetooth Oil Temperature Probe
- ✓ Battery RPM Measurement
- ✓ PC Kit

Technical data and Dimensions

Cabinet Dimensions	1600mm(H) x 950mm(W) x 700mm(D)
Connection Method	WiFi/Bluetooth
Fuel Types	Diesel
Power Required	240v 50/60hz
